

American Fueling Systems Opens First Green Fuel Facility in Columbus, Georgia

December 9, 2015

American Fueling Systems (AFS), a leader in the alternative fuels industry, has opened its newest Compressed Natural Gas (CNG) facility in Columbus, GA located at 4506 Armour Road. This facility is the first CNG facility in the city of Columbus and the second largest in the state of Georgia. This \$2 million facility will service the fueling needs for the City of Columbus, Muscogee County Schools, and many other public and private fleets in the area. The presence of this public fueling facility in Columbus offers access to safer, cleaner burning transportation fuel with considerably less harmful emissions.

AFS's newest station maintains the characteristics that customers nationwide have become accustomed to with any AFS facility. It is open 24 hours a day, 7 days a week and offers 3 dispensers with 6 hoses so that there would never be line for customers to fuel; and like all AFS locations accepts all major credit and fleet cards. This facility is located on a major thoroughfare of Columbus less than 0.2 miles from Interstate 185 at exit 7. It also features 24 hour on site assistance for drivers and guarantees a 99.9% uptime guarantee.

This new facility showcases AFS's dedication to further developing CNG infrastructure throughout the U.S. AFS's CEO, Rahim Charania states: "Our aim is to become the first mover in the city of Columbus, Georgia. AFS has identified tremendous potential for alternative fuel sales in the Columbus area. This market is primed for growth and AFS will develop unique solutions to accelerate the rate of growth through its active business development capabilities".

The grand opening event featured Columbus' own Lisa Goodwin, Deputy City Manager along with business and community leaders from Liberty Utilities, Clean Cities GA, Penske and the Muscogee County school District. AFS and the City of Columbus collaborative efforts are aimed toward positive growth and sustainable energy solutions.

With this new facility the City of Columbus, Georgia and neighboring areas will, for the first time, have access to an alternative fuel that is cleaner for the environment, and sourced right here in the United States. "We are very proud of this new facility and we are even prouder to serve the community here in Columbus." Said Sergio Martinez with AFS "Our goal is to meet our customer's needs and provide them solutions that can save them money and improve their environment."

About American Fueling Solutions:

American Fueling Systems (AFS) is a national leader in the alternative fueling industry, providing alternative fuel such as Compressed Natural Gas (CNG) and Liquefied Natural Gas (LNG) and Bio Diesel to the transportation and energy sectors. We offer services that range from delivering LNG to portable power generators to operating fueling stations that provide CNG to fleet users. In addition, AFS boasts design/build services, equipment sales, and a consulting team that has advised municipalities and Fortune 500 companies alike on the costs and benefits of adopting an alternative fueling strategy.
