FOR IMMEDIATE RELEASE

AFS Opens Houston's First CNG & Diesel Station

Houston, TX, December 13, 2016 - In their effort to become green conscious, the City of Houston has for the first time, a new alternative fueling station that offers Compressed Natural Gas (CNG) and Diesel. Operated by American Fueling Systems (AFS), which is located at: 7530 East Orem Drive, Houston, TX, 77075, this station will overhaul the need to service large fleet companies in the area and promote a unique fueling experience.

"The Texas Commission on Environmental Quality (TECQ) was instrumental in assisting AFS with this project. TECQ provided a grant program that spearheaded the city of Houston's future with the utilization of alternative fuels. We are honored to have been awarded this grant and look forward to helping the state of Texas move towards a sustainable infrastructure," said Rahim Charania, CEO of American Fueling Systems.

American Fueling Systems (AFS), is a national leader in the alternative fuels industry and opened their Houston CNG and Diesel facility in December of 2016. This facility is the first CNG facility in Houston and the largest in the state of Texas. This unattended and fully automated facility is opened 24 hours a day, 7 days and accepts payment from all major credit and fleet cards. AFS provides alternative fuels such as Compressed Natural Gas (CNG), Liquefied Natural Gas (LNG) and Biodiesel to the transportation and energy sectors. AFS boasts of design/build services, equipment sales and a consulting team that has advised municipalities along with Fortune 500 companies alike, on the cost and benefits of adopting an alternative fueling strategy.

If you would like more information about American Fueling Systems and/or utilizing an alternative fuels, please call: Sergio Martinez at: (770)-399-7800, or email: smartinez@americanfuelsystems.com.
